A new species of product tool. Purpose-built for modern teams with AI workflows at its core, Linear sets a new standard for planning and building products.

FIG 0.0.0

Purpose-built

Linear is shaped by the practices and principles of world-class product teams.

FIG 0.0.0

Powered by agents

Designed for workflows shared by humans and agents. From drafting PRDs to posting PRs.

FIG 0.0.0

Designed for speed

Reduces noise and restores momentum to help teams ship with high velocity and focus.

A new species of product tool. Purpose-built for modern teams with AI workflows at its core, Linear sets a new standard for planning and building products.

Purpose-built

Purpose-built
Linear is shaped by the practices and principles of world-class product teams.

Powered by Agents

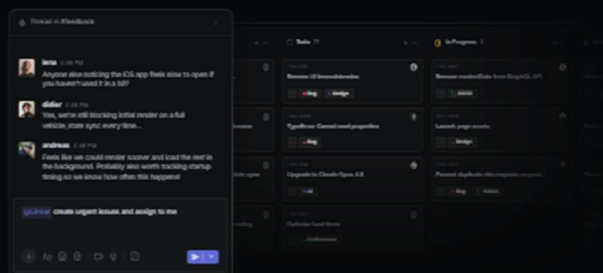

Designed for workflows shared by humans and agents. From drafting PDCs to pushing PDCs.

Designed for speed

Reduce noise and restore momentum to help team ship with high velocity and focus.

Make product operations self-driving

Turn conversations and customer feedback into actionable issues that are routed, labeled, and prioritized for the right team.

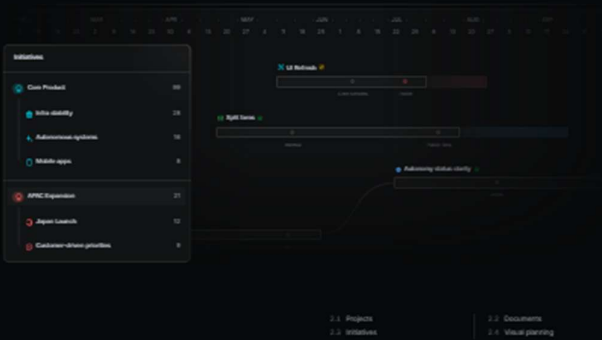

- 1.1 Linear Agent
- 1.2 Customer Requests

- 3.2 Triage
- 3.4 Linear Axiom

Define the product direction

Plan and navigate from idea to launch. Align your team with product initiatives, strategic roadmaps, and clear, up-to-date PRDs.

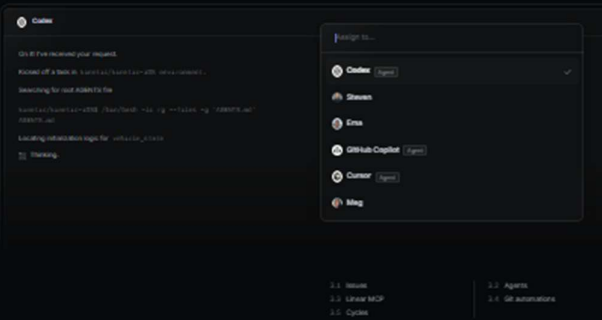

2.0 Plan →

Move work forward across teams and agents

Build and deploy AI agents that work alongside your team. Work on complex tasks together or delegate entire issues end-to-end.

3.0 Build →

Review PRs and agent output

Understand code changes at a glance with structural diffs for human and agent output. Review, discuss, and merge — all within Linear.

1.0 Cite →

```
17 import React from "react"
18 import { View, AccessibilityIndicator } from "react-native"
19 import { AccessibilityIndicator } from "react-native"
20 import { AccessibilityIndicator } from "react-native"
21 import { AccessibilityIndicator } from "react-native"
22
23 export const AccessibilityIndicator = () => {
24   return (
25     <AccessibilityIndicator
26       accessibilityLabel="AccessibilityIndicator"
27       accessibilityRole="Image"
28     />
29   )
30 }
31
32 export default AccessibilityIndicator
```

Understand progress at scale

Take the guesswork out of product development with project updates, analytics, and dashboards that surface what needs your attention.

1.0 Monitor →

1.1 Pulse

1.2 Dashboards

1.3 Insights

Linear powers over 32,000 product teams. From ambitious startups to major enterprises.
